

WEEK 5– EMPLOYEE DATABASE

Schema Diagram

ER Diagram

TO DO:

1) Using Scheme diagram, Create tables by properly specifying the primary keys and the foreign keys.

(CREATION)

```
create database dhiksha_employee;
use dhiksha_employee;
create table dhiksha_employee.project(
pno int,
ploc varchar(40),
pname varchar(40),
PRIMARY KEY(pno)
);
create table dhiksha_employee.dept(
deptno int,
dname varchar(40),
dloc varchar(40),
PRIMARY KEY(deptno)
);
create table dhiksha_employee.employee(
empno int,
ename varchar(40),
mgr_no int,
hiredate date,
sal int,
deptno int,
primary key (empno),
foreign key (deptno) references dept(deptno)
);
create table dhiksha_employee.incentives(
empno int,
incentive_date date,
incentive_amount int,
primary key(incentive_date),
foreign key (empno) references employee(empno)
);
create table dhiksha_employee.assigned_to(
empno int,
```

```

pno int,
job_role varchar(50),
foreign key (pno) references project(pno),
foreign key (empno) references employee(empno)
);

```

2) Enter greater than five tuples for each table.

(INSERTION)

```

insert into project values(1,"Bengaluru","Syntax");
insert into project values(2,"Gujurat","Rolex");
insert into project values(3,"Mysuru","Hybrid");
insert into project values(4,"Hyderabad","Synergy");
insert into project values(5,"Mumbai","Mercury");

```

```

insert into dept values(10,"Sales","Bengaluru");
insert into dept values(20,"Finance","West Bengal");
insert into dept values(30,"Marketing","Bihar");
insert into dept values(40,"Purchase","Mumbai");
insert into dept values(50,"Research & Develeopment","Hyderabad");

```

```

insert into employee values(100,"Prannay",400,'2003-01-01',100000,10);
insert into employee values(200,"Farhaan",500,'2004-02-02',100500,50);
insert into employee values(300,"Sanika",100,'2003-01-21',200500,30);
insert into employee values(400,"Sakshi", NULL ,'2008-02-17',300500,40);
insert into employee values(500,"Nishith",300,'2004-03-05',200700,40);
insert into employee values(600,"Sohan",200,'2005-11-01',200000,20);
insert into employee values(700,"Mahima",200,'2005-11-21',200900,20);

```

```

insert into incentives values(100,'2012-02-17',6000);
insert into incentives values(200,'2012-05-21',7000);
insert into incentives values(400,'2012-07-25',6500);
insert into incentives values(500,'2013-04-19',7400);
insert into incentives values(600,'2013-08-08',8000);

```

```

insert into assigned_to values(100,1, "Project Manager");
insert into assigned_to values(200,1, "Resource Manager");
insert into assigned_to values(300,2, "Business Analyst");
insert into assigned_to values(400,3, "Business Analyst");
insert into assigned_to values(500,3, "Project Manager");
insert into assigned_to values(600,5, "Resource Manager");

```

- **SELECTION**

select * from project;

Result Grid			
Filter Rows: <input type="text"/>			
Edit:   			
Export/Import:  			
Wrap Cell Content: 			
pno	ploc	pname	
1	Bengaluru	Syntax	
2	Gujurat	Rolex	
3	Mysuru	Hybrid	
4	Hyderabad,	Synergy	
5	Mumbai	Mercury	
NULL	NULL	NULL	

project 14 x

select * from dept;

Result Grid			
Filter Rows: <input type="text"/>			
Edit:

300	Sanika	100	2003-01-21	200500	30	
400	Sakshi	NULL	2008-02-17	300500	40	
500	Nishith	300	2004-03-05	200700	40	
600	Sohan	200	2005-11-01	200000	20	
700	Mahima	200	2005-11-21	200900	20	
NULL	NULL	NULL	NULL	NULL	NULL	

employee 16 x

select * from incentives;

Result Grid			
Filter Rows: <input type="text"/>			
Edit:   			
Export/Import:  			
Wrap Cell Content: 			
empno	incentive_date	incentive_amount	
100	2012-02-17	6000	
200	2012-05-21	7000	
400	2012-07-25	6500	
500	2013-04-19	7400	
600	2013-08-08	8000	
NULL	NULL	NULL	

incentives 17 x

select * from assigned_to;

Result Grid			
Filter Rows: <input type="text"/>			
Export: 			
Wrap Cell Content: 			
empno	pno	job_role	
100	1	Project Manager	
200	1	Resource Manager	
300	2	Business Analyst	
400	3	Business Analyst	
500	3	Project Manager	
600	5	Resource Manager	

assigned_to 18 x

3) Retrieve the employee numbers of all employees who work on project located in Bengaluru, Hyderabad, or Mysuru.

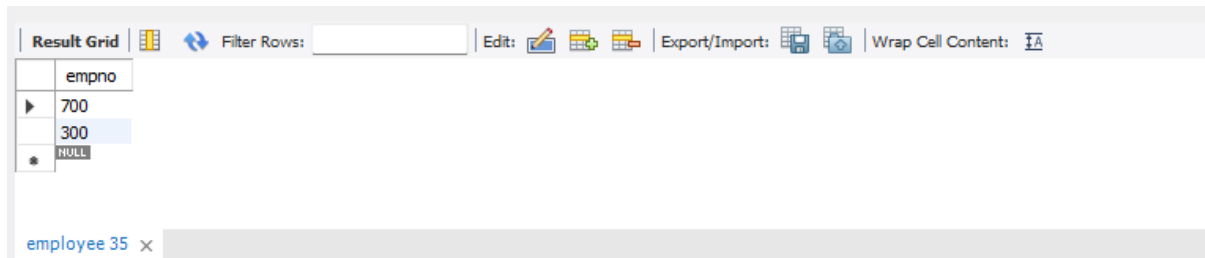

select a.empno Employee_number from project p, assigned_to a
where p.pno=a.pno and p.ploc in("Hyderabad","Bengaluru","Mysuru");

Result Grid	
Filter Rows: <input type="text"/>	
Export: 	
Wrap Cell Content: 	
Employee_number	
100	
200	
400	
500	

Result 44 x

4) **Get Employee ID's of those employees who didn't receive incentives**

```
select e.empno from employee e
where e.empno NOT IN
(select i.empno from incentives i);
```

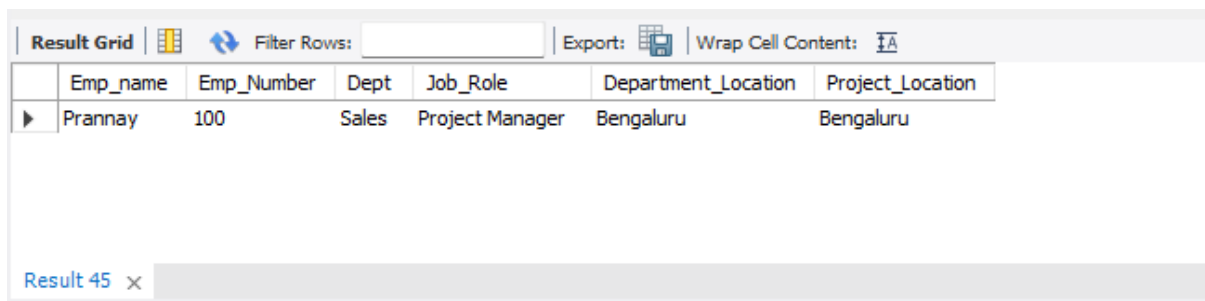

The screenshot shows a database interface with a toolbar at the top containing icons for 'Result Grid', 'Filter Rows', 'Edit', 'Export/Import', and 'Wrap Cell Content'. Below the toolbar is a table with a single column labeled 'empno'. The table contains three rows: 700, 300, and NULL. The row with '300' is highlighted. At the bottom of the interface, there is a tab labeled 'employee 35' with a close button 'x'.

empno
700
300
NULL

employee 35 x

5) **Write a SQL query to find the employees name, number, dept, job role, department location and project location who are working for a project location same as his/her department location.**

```
select e.ename Emp_name, e.empno Emp_Number, d.dname Dept,
a.job_role Job_Role, d.dloc Department_Location, p.ploc
Project_Location
from project p, dept d, employee e, assigned_to a
where e.empno=a.empno and p.pno=a.pno and e.deptno=d.deptno and
p.ploc=d.dloc;
```

The screenshot shows a database interface with a toolbar at the top containing icons for 'Result Grid', 'Filter Rows', 'Export', and 'Wrap Cell Content'. Below the toolbar is a table with six columns: 'Emp_name', 'Emp_Number', 'Dept', 'Job_Role', 'Department_Location', and 'Project_Location'. The table contains one row with the following data: Prannay, 100, Sales, Project Manager, Bengaluru, Bengaluru. The row is highlighted. At the bottom of the interface, there is a tab labeled 'Result 45' with a close button 'x'.

Emp_name	Emp_Number	Dept	Job_Role	Department_Location	Project_Location
Prannay	100	Sales	Project Manager	Bengaluru	Bengaluru

Result 45 x

SPOT QUERY:

Find the employee name, dept name and job role of an employee who received maximum incentive in year 2012

```
select e.ename, d.dname, a.job_role, MAX(i.incentive_amount)  
MAX_incentive
```

```
from employee e, dept d, incentives i, assigned_to a
```

```
where incentive_date between '2012-01-01' and '2012-12-31';
```

Result Grid			Filter Rows: <input type="text"/>	Export: 	Wrap Cell Content: 
	ename	dname	job_role	MAX_incentive	
▶	Prannay	Sales	Resource Manager	7000	

Result 38 x
